

Science Recovery Curriculum

This term we will be teaching double science lessons on a weekly basis rather than our termly weekly block in the past. This will enable all year groups to catch up on their science learning that has been missed from the summer term.

This half term we will be concentrating on:

Year 3 will be learning about living things in their habitats from the Year 2 curriculum.

Year 4 will be learning about skeletons and muscles, and Rocks from the Year 3 curriculum.

Year 5 will be learning about living things and their habitats from the Year 4 curriculum.

Year 6 will be learning about lifecycles from the Year 5 curriculum.

We will then be resuming with the children's current year group science topics after half term. These will be:

Year 3 will be learning about forces, magnets and light with a scientist study.

Year 4 will be learning about electricity and sound with a scientist study.

Year 5 will be learning about earth, space and forces with a scientist study.

Year 6 will be learning about electricity and light with a scientist study.
